

POWERBLANKET Gas Cylinder Warming

Until now, cylinder tank heating has been virtually impossible to maintain on any kind of consistent basis. With Powerblanket Gas Cylinder heating blankets, there are no open flames, no makeshift heat ovens, no high wattage forced air blowers and no longer any hot spot concerns using band heaters. Powerblanket is now available in Canada through stocking distributors Power Plant Supply Co with convenient locations to serve Canadian customers. <http://www.powerplantsupplyco.com>: <mailto:atlantic@powerplantsupplyco.com>

GreenHeat Technology by Powerblanket introduced a new patented heat spreading technology that is both low wattage and UL/CSA safety certified. Powerblanket is engineered with three main components:

- 1. UL weather resistant vinyl rated down to -55F**
- 2. Unique internal insulated foam**
- 3. Patented heat spreading materials for an even, consistent heat**

Powerblanket cylinder/tank heat products range in size from small 20 gallon propane cylinders to very large 20,000 gallon holding tanks. Gases known to benefit from this unique heating process include:

- SF₆, Propane, Nitrogen, Oxygen, BCl₃, WF₆, and HF
- Powerblanket heat wraps fit most gas cylinder tanks
- Full surface coverage for better heating
- Insulation reduces heat loss Certified to UL/CSA safety standards
- 120 & 240v available
- Weather-proof and water resistant
- Heats compressed gases to optimal temperatures for maximum safe output
- Reduce waste and eliminate unnecessary tank refills
- Optional adjustable thermostat available

Everyone knows when working with gases, each gas has its sweet spot. In a liquid propane (LP) tank for example, part of the volume is occupied by liquid and part is occupied by gas. The pressure of the gas is governed by the temperature of the liquid. Powerblanket heated GCW tank wraps help warm and insulate propane and other gases to achieve maximum safe output.

COMMON USES:

Heat Propane and other Gases | Cylinder Warming | BBQ Tank Heating | Gas & Oil Heating | Tank Heating
